

Chalk Stencil Collage

I can think creatively.

I can figure out what to do to get the results I want.

Overlapping pictures or shapes make a collage. What will you create for your collage?

Give it a Try!

1. Choose a stencil for your collage.
2. Place your stencil on the black construction paper and trace around it with a piece of chalk.
3. Keep the stencil in place while you use a cotton ball to lightly brush the chalk out from the stencil shape.
4. Remove the stencil and place it somewhere else on the paper.
5. Continue tracing the stencil around the paper with different colors of chalk to create a collage of overlapping shapes.

MATERIALS:

- Black construction paper
- Colored chalk
- Cotton balls
